The Trinity 1.5 Shirt is the hunting garment that no-one dared dream of. The foundation of this innovative creation is ScentBlocker's Trinity™ technology which adsorbs human odor like no other. Built on new age ultra-lightweight, breathable, technical fabric with 4 Direction Stretch and Micro Wick to keep you cool and dry. Then, finish it off with advanced S3 silver anti-microbial treatment to reduce odor-causing bacteria. Hunting with scent control has never been like this, and no one else has it.

- 
- Trinity 1.5 Performance Shirt:  
92% Polyester/8% Spandex Jersey fabric with Trinity Technology printed on the back
- Crew neck style shirt
- Raglan sleeves for ease of movement
- Thumbholes for easy layering

**Trinity™ Scent Control Technology** For over 10 years Robinson Outdoor products has worked to develop Trinity™ Technology, the new pinnacle in human scent control. Trinity Technology is designed around a cutting edge synthetic polymer that was specifically created to adsorb human odor. With a huge surface area and more adsorptive kinetics, Trinity Technology will surpass the old industry standard of scent control and set the bar at a whole new level. With clothing, liquids, detergent and spray; Trinity will have a product available for everyone's budget and needs. Simply put- this technology is amazing and available nowhere else.

**4 Direction Stretch™** Provides superior comfort, fit and freedom of movement. The inherent multi-directional stretch of the fabric allows you to perform the movements needed to hunt while not worrying about your garment binding or restricting you.

**Micro-Wick™ Technology** Contains a unique moisture wicking element to disperse moisture away from the skin to keep you dry and better regulate temperatures and enhance comfort.

**S3™ Silver Anti-Microbial Technology** S3 products utilize antimicrobial technology which helps to inhibit the growth of odor causing bacteria. S3 keeps the garment smelling fresher longer.
